Portfolio: vetri-12.github.io/vetriselvam-K-portfolio/

PROFESSIONAL SUMMARY

B.Tech Information Technology graduate with practical experience in ERP software, business requirements, software workflows, client communication, onboarding, implementation coordination, and functional validation. At Vensanix Global, define requirements, workflows, functional modules, reports, and solution architecture for business software projects, with hands-on AI-assisted development and deployment exposure. Strong at translating business needs into practical software solutions and explaining technology clearly. Foundational SQL, Python, and REST/API knowledge, currently strengthening through practical learning.

PROFESSIONAL EXPERIENCE

VENSANIX GLOBAL | Software Solutions Consultant | Feb 2026 – Present

- Understand business problems and translate client requirements into functional workflows, module structures, and software solutions.
- Define business requirements, application workflows, functional specifications, dashboards, reports, and operational processes for custom software projects.
- Worked on a production B2B ERP solution for the facade, glass, and construction industry using an AI-assisted development approach with Laravel, Filament PHP, Livewire, and Tailwind CSS.
- Review and refine AI-generated code, troubleshoot functional issues, validate business logic, and perform manual functional testing before delivery.
- Work through the software lifecycle from requirement discovery and solution design through testing, deployment, and client workflow validation.
- Developed and deployed a corporate WordPress website, including requirements translation, implementation, domain/hosting configuration, and production deployment.

MAXX BUSINESS SOLUTIONS | Business Development Executive — ERP Software | Oct 2025 – Jun 2026

- Conducted ERP product demonstrations tailored to client business workflows and operational requirements.
- Engaged with business stakeholders to understand operational needs and map requirements to ERP functionality.
- Supported client onboarding, deployment, training, and go-live activities with internal teams.
- Clarified implementation questions, workflow issues, and client feedback between customers and internal teams.
- Supported users in understanding ERP functionality and business workflows during implementation and adoption.

SELECTED PROJECTS

Custom B2B ERP — Facade, Glass & Construction Industry

Defined business requirements, workflows, module structures, and solution architecture for a production ERP application. Worked on account/product masters, purchase orders, work orders, fabricator measurements, delivery challans, reports, PDF/document workflows, Excel exports, financial processes, and company-scoped data structures. Used AI-assisted development for implementation while personally reviewing, refining, troubleshooting, and functionally validating the application.

Corporate Website Development — CPG Facade Private Limited

Translated client requirements into a professional WordPress website and handled implementation, responsive layouts, domain/hosting configuration, deployment, client review, and ongoing updates.

SKILLS

Business Analysis: Requirements gathering, process understanding, workflow mapping, stakeholder communication, functional specifications

ERP & Implementation: ERP workflows, implementation lifecycle, onboarding, deployment/go-live coordination, client training, workflow validation

Software & Product: Software solution design, SaaS/product workflow understanding, business process automation, functional documentation

AI & Development: AI-assisted development, LLM tool usage, functional prototyping, software architecture, Laravel, Filament PHP, Livewire, Tailwind CSS

Testing & Support: Manual functional testing, workflow validation, defect identification, issue reporting, UAT concepts, application troubleshooting

Technical Fundamentals: SQL — foundational, Python — foundational, REST/API concepts — basic, web application concepts, Excel/Google Sheets

Web & Infrastructure: WordPress, Elementor, web hosting, DNS, Git

EDUCATION

B.Tech Information Technology — Vel Tech High Tech Dr. Rangarajan Dr. Sakunthala Engineering College | 2021 – 2025 | CGPA 7.1/10
